

Peace of Mind

Our Pool Safety products, coupled with your supervision, means no more bad dreams, and less worries.

Pool Fence

Pool Gate

Pool Cover

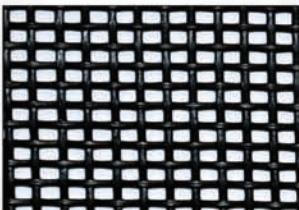

Pool Alarm

PoolFence Pro removable pool safety fence is designed specifically to provide a barrier around swimming pools to help prevent child and pet access. It is installed in sections connected at the top by a child proof latch. Each section consists of poles spaced at regular intervals and mounted into plastic or aluminum inserts that have been core drilled into the pool deck surface. A nearly transparent mesh material is stretched across these support poles. Our support poles are made of powder coated aluminum. The system works on bi-lateral tension and can be easily removed and reinstalled by an adult.

Available in 42", 48", or 60" heights

Pool Fence Features

Mesh

Textilene 12-12 mil with a polyvinyl coating. With a basket weave which is the most intensive mesh to mil and labeled the strongest mesh

available in the industry. It is dual directional and ensures a lifetime of worry free use.

Border

Heavy chain marine stitched reinforced nylon fabric border. The marine heavy chain stitch is used when a tough thread and stitch is required for

outdoor use. This border contains nylon fibers inside to prevent cracking and weathering due to harsh weather.

Poles

Heavy gauge 1/4" stock aluminum poles are 4 to 5 times stronger than any other pole in the industry. Its a difference you can see and feel! The thicker the

gauge of the pole the stronger the pole will be. These poles are only available through PoolFence Pro.

Safety Latch

100% stainless steel safety snap latch. We use only stainless steel in our latches. We took the best of all products and combined them into one

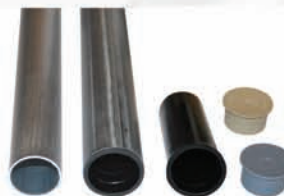

superior latch. designed for child safety.

Gate

Our gate is a double truss curved 1-1/4" heavy gauge square stock aluminum. This type of gate uses the most aluminum material in the

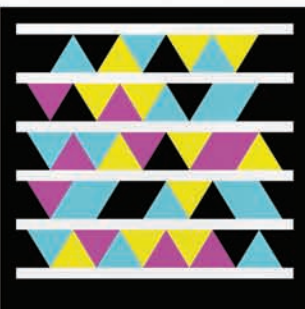

industry. The latch is installed high up making it harder for a child to reach. Our gates are the strongest and most attractive gate available today.

Deck Inserts

Our standard plastic deck inserts are 5-1/2" long (1/3 longer than standard plastic deck inserts). This allows for the securest installations in concrete

decks and pavers on top of concrete. We also can use longer aluminum or galvanized sleeves to provide the necessary support for a safe installation.
